

## SALE OF BENTLEY EXPECTED TO ADD STRENGTH TO N. Y.

Baseball Circles Agog Over Acquisition of Versatile Player by Giants.

NEW YORK, Oct. 31.—Baseball circles were agog today over the acquisition by the world champion Giants yesterday of Jack Bentley, star batsman and pitcher of the Baltimore International League Club, for a reported consideration of \$50,000 in cash and four players. Club officials declined to confirm reports of the purchase price, but baseball men ranked the deal in importance with the sale of Jimmy O'Connell to the Giants for \$75,000 and Willie Kamm to the White Sox for \$100,000, both from the San Francisco Club of the Pacific Coast League.

Bentley is one of the most versatile stars in the minor leagues. He is a veteran, having performed with Washington in the American League, from 1913 to 1916, but his reputation as a home-run slugger and pitcher and all-around star has been gained in the past few seasons as an important cog in the machine. Jack Dunn has piloted to several International League flags. He is 28 years old. Bentley has done most of his playing at first base for Baltimore during the past few seasons, although he has occasionally taken a turn in the box, winning twenty-five out of twenty-seven games he twirled in the last two seasons. He is a southpaw, and it is probable that McGraw will groom him to bolster up the Giant twirling staff.

Last year Bentley finished with a batting average of .349. He was third on the league batting list. The year before he led the league with a mark of .412.

The sale of Bentley in International circles was regarded as the first step toward reorganization of the Baltimore team, which has made a run-away race of the circuit for several years.

## BUSINESS TEACHERS WILL MEET NOV. 3

HARRISBURG, Pa., Oct. 31.—A regional conference of teachers of business subjects and social studies in high schools in Pennsylvania, Delaware, Maryland, the District of Columbia and Southern New Jersey will be held in Philadelphia November 3 and 4. The meeting, it was announced by the Department of Public Instruction here today, has been called by the United States Bureau of Education in cooperation with the United States Bureau of Foreign and Domestic Commerce, the Pennsylvania State Chamber of Commerce and the Philadelphia Board of Education and Department of Superintendence.

The correlation of standardized business experience and the teaching of high school business subjects is the announced purpose of the meeting and with this in view representatives of organized business have been invited. They have been asked to point out how their organizations promote and serve business, "Organization and Conduct of Business," "Production and Marketing" and "Office Management" are the topics for discussion at the three sessions to be held.

Glenn Swiggert of the United States Bureau of Education is chairman of the conference and George Wheeler, associate superintendent of the Philadelphia public schools, is chairman of the local arrangements committee.

## HERSCHEL ROSE SPEAKS AT NEW PITCHER SCHOOL

Herschel H. Rose, Fairmont attorney, addressed the students and patrons of the Pitcher Public School Friday evening at the new school building on Pennsylvania avenue. Attorney Rose spoke to the assembly in a humorous vein, but his main theme was born of seriousness. The gist of the address was contained in his concluding words when he said, "Be a good American wherever you are and you will be of service to your country." An invitation to make a return address at the next community meeting of the school was extended to Mr. Rose by Principal P. M. Ruder.

In addition to the main address of the evening an interesting program was carried out in the following order: Singing of "America" by the assembly; recitation, "Hello, John Rodwell," song, "Jesus Loves Me," the first grade; recitation, "Wondering," Genevieve King, recitation, "The American's Creed," Phillip Jazwinski; song, "A Wee, Wee Man," the first grade; recitation, "The Boys We Need," Tony Rodwell; recitation, "Parents' Day," Dorothy Satterfield; dialogue, "October and Ghosts," two girls; recitation, "Their Surprise," Nellie Satterfield; recitation, "The Yellow Leaves," Elizabeth Jazwinski; song, "Who Wakes First in the Morning," second grade.

At the conclusion of the program an invitation was extended to the audience to attend meetings at the school next week in celebration of Educational Week.

180 Musicians, 1500 Sticks of Red Fire, Floats Galore, Hear the Suptes Scream. Count the Mount- ed Men.

Mr. and Mrs. John Brown of Columbia street have returned from a two weeks' visit among relatives at Philadelphia and Washington, D. C.

Herndon Pawcett of Guffy street is indisposed.

Miss Sylvia Zinn is ill with diphtheria at her home in Blaine street.

Miss Velma Walls of Morgantown spent the week-end with Miss Dona Adams in State street.

Miss Carrie Board of Smithfield, Pa., is the guest of Miss Olive Dunham in State street.

## CAPACITY OF COAL PIERS INCREASED

Big Improvements Being Made at Hampton Roads for Handling of Fuel.

NORFOLK, Virginia, Oct. 31.—Coal pier developments, which will more than double the coal handling capacity of the Hampton Roads piers, are either already under way or scheduled to begin early in 1923. These improvements will represent an aggregate expenditure of about \$5,500,000.

The Norfolk Western Railway has already begun the electrification of its piers 2 and 3 at Lambert's Point, and the work is about 35 per cent complete. When it is finished it will provide one of the greatest single coal terminals in the world, with three piers equipped with all modern devices and using 120 ton coal bumpers.

The Virginian Railway has made surveys for the construction of another steel pier at Hewalls Point. The project is expected to cost \$3,000,000 and the plans for the pier, it is understood, have been drawn. Just when the Virginian will be ready to begin this work has not been ascertained here.

A steel pier to cost \$2,500,000 or more will be built by the Chesapeake and Ohio Railway at Newport News next spring, giving unexcelled coal-handling facilities on that side of Hampton Roads. The construction of this pier is a feature of a big project calling for the expenditure of over \$15,000,000 by that railroad in the East.

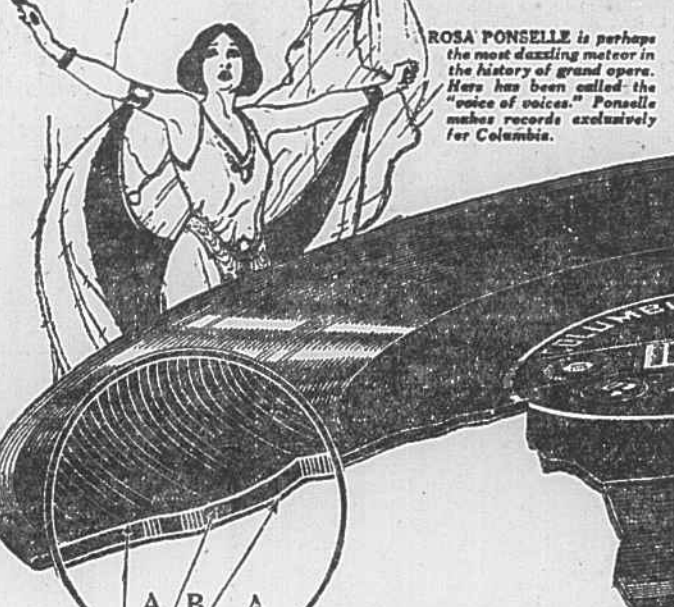

This additional coal handling equipment will more than double the aggregate capacity of Hampton Roads piers. The Norfolk & Western improvement, alone will increase the capacity of those piers by between 500,000 and 600,000 tons per month. The new pier of the Virginian should be capable of dumping anywhere from 500,000 tons per month up to 750,000 tons or more, while the Chesapeake & Ohio pier should be of equal capacity.

With the construction of additional waterfront facilities by the city and the acquisition of additional warehouses and pier space at the Army Base for municipal operation, an increase in general shipping is confidently expected for this port, and this will mean greater demand for bunker coal, as well as for cargo coal in large quantities. The construction of the new piers and the general improvement of coal shipping conditions, will give assurance of even quicker dispatch to vessels here.

Come to Fairmont Halloween Oct. 31st. Mammoth Parade and Jubilee.

# Startling Good News for Phonograph Owners!

Columbia discovers a process which produces records free from objectionable Surface Noise!

ROSA PONSILLE is perhaps the most dazzling talent in the history of grand opera. Here has been called the "voice of voices." Ponsille makes records exclusively for Columbia.

As a phonograph owner you have always been annoyed by the swish and grinding and scratching noises on records. This "surface noise" has been considered impossible to remove. After years of experiment, the Columbia Graphophone Company to-day presents to the world a record that is virtually noiseless.

This record has been made possible by the discovery, in Columbia laboratories, of a process by which we are able to produce a surface material so fine in texture, so marvelously smooth, so free from friction that the phonograph needle travels over it almost inaudibly and with imperceptible wear.

The playing-result from the use of this new material is actually astounding—no other word can describe it. Melody unmarred by penetrating, obtrusive surface sounds, harmony without disconcerting scratch or scrape—think what this means to you and to every phonograph owner in the world.

This is made practical by Columbia's patented laminated, or three-ply, construction. The core or center leaf in Columbia New Process Records, because it is absolutely distinct from the playing surfaces, is made of a harder, more durable substance. Over this rigid backbone are laid the two playing faces made of the new, ultra fine, ultra smooth surface fabric.

This laminated construction gives greatly increased strength and longevity plus the most noiseless surface ever perfected.

The invention of this new process record by the Columbia Graphophone Co.—for it is the genius-creation of Columbia engineers and chemists—marks the greatest outstanding improvement since the invention of the universally used disc record.

With New Process Columbia Records you get all the real beauty of voice; all the exquisite, delicate tones of the cello and the violin! You get melody uncontaminated by objectionable surface noise that has been considered impossible to remove UNTIL COLUMBIA REMOVED IT!

So great is our confidence in the enjoyment New Process Columbia Records provide that we ask you to tear out the list of records in this advertisement, take it to a Columbia Dealer and have him play them! Possibly he can play the same selections by other makers! Each comparison test will be a greater Columbia triumph!

You will be thrilled by the Columbia reproduction of every note, every inflection; of the most delicate phrasing—shades of harmony exquisitely expressed that have previously been LOST IN SURFACE NOISES!

In comparison with ordinary records, as made by other manufacturers, New Process Columbia Records will prove immediately preferable.

No other record can be like New Process Columbia Records. No one can produce anything even resembling them, for they are fully protected by broad basic patents.

COLUMBIA GRAPHOPHONE CO., New York

This illustrates the laminated construction of new process Columbia Records.

A—illustrates the much smoother playing surfaces which are made of a new substance over which the needle travels almost inaudibly.

B—illustrates the much harder center core which resists warping.
